You must completely fill out the information below to receive your results and possible CME credit. You must correctly answer 70\% or more of the five questions below to be awarded CME credit. Submit completed test to jenny@societyhq.com for scoring.

Name:

AOA \#:

## Email Address:

Institution:

## Module 1: Osteopathic Manipulation for Acute Otitis Media in the Pediatric Population

1. What is the most common bacterial cause of AOM?
$\square$ A. Haemophilus Influenza
$\square$ B. Moraxella catarrhalis
$\square$ C. Pseudomonas aeruginosa
D. Streptococcus pneumonia
E. Bordatella pertussis
2. Which of the following has been found to result from OMT for recurrent AOM?
A. Increased use of tympanostomy tubesB. Increased use of pain medication with AOM episode
$\square$ C. Decreased course of antibiotics for AOM episode
$\square$ D. Decreased incidence of AOM
$\square$ E. Flattening of a tympanogram with AOM
3. Which of the following will most likely help prevent recurrent AOM?
$\square$ A. Oral antihistamines
B. Decongestants
$\square$ C. ОMT
$\square$ D. Prophylactic daily antibiotics
$\square$ E. Sleeping in the prone position
4. Which of the following provides parasympathetic innnervation to the head and neck?
A. Cranial nerve I
$\square$ B. Cranial nerve II
$\square$ C. Cranial nerve III
$\square$ D. Cranial nerve IV
$\square$ E. Cranial nerve V
5. Which of the following areas needs treated to effect change in the sympathetic innervation to the head and neck?
$\square$ A. C 3-5
$\square$ B. Т 1-4
$\square$ C. T 5-9
$\square$ D. T12-L2
$\square$ E. L5-S1
